## SUMMARY

Information Technology student who enjoys turning ideas into working software – from Python scripts to full-stack web pages. Picked up hands-on experience through an industry internship and back-to-back technical bootcamps, and is just as comfortable digging into data as building an interface. Also co-authored two research papers along the way, earning a 3rd-place award for presenting one of them.

## EDUCATION

|                                                                                                          |                                         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Python Development Intern</b><br><i>Cognifyz Technologies</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Dec. 2025 – Jan. 2026 |
| <ul style="list-style-type: none"><li>Assigned real-world Python development tasks during a structured internship; wrote, tested, and debugged scripts to meet each task's requirements, delivering working solutions that reinforced core programming and problem-solving fundamentals</li><li>Partnered with a development team on hands-on assignments, communicating progress and resolving issues collaboratively, which built practical teamwork and workplace-communication skills in a live software environment</li></ul> |                       |

## TECHNICAL SKILLS

**Languages:** Python  
**Web Development:** HTML, CSS, Full-Stack Development  
**Concepts:** Object-Oriented Programming (OOP), Data Science, Artificial Intelligence Foundations  
**Tools:** Excel  
**Professional Skills:** Teamwork, Communication, Technical Presentation
